

Technical Recruiting Summary

We have successfully recruited for a steady stream of B2B Technical projects.

These projects have typically fielded over 2 - 3 weeks and required input from 6 - 25 respondents from ITDM, BDM, technical supervisory, and implementation roles in a variety of industry segments. Research formats included small groups, IDIs (both in-person and virtual), and UX sessions to obtain feedback on new interfaces, features, and support functionalities, to name a few.

Specifically, we have recruited numerous studies for end clients including two of the largest cloud platforms, industry leading software providers, established hardware manufacturers, prominent social media sites, and the largest online retailer on the planet.

Technical Specializations

- AI Design
- AR/VR Systems and Development
- Business Intelligence Solutions
- Business Service Selection & Purchasing
 - including software, hardware & telephony
- Chatbot Development
- Cloud Platforms
- Cloud Resellers
- Cloud Services and Hybridization
- Connected Devices
- Cryptocurrency
- Cybersecurity
- Data Analysis & Visualization
- Data Integration
- Data Science
- ERP Solutions
- File Sharing Systems
- Help Desk Applications
- HR Software
- Information Storage Solutions
- IoT
- Marketing Technology
- Natural Language Programming
- Neuro-Linguistic Programming
- Open Source Software
- Predictive Intelligence
- Product Documentation and Support
- Productivity and Collaboration Software & Tools
- Service Availability
- Technical Trends
- Website Usability
- Wireless/Wireline Technology

Professional Titles

- AI Developer & Architect/Engineers
- Android Developer
- Application Engineer & Developer
- AWS Architect & Developer
- Azure Architect & Developer
- BDMs - VPs, Sr. Directors in HR, Finance & Operations
- Chatbot Developer
- Cloud Architect
- Cloud Engineer
- Cloud Infrastructure Architect
- Cloud Infrastructure Developer
- Cybersecurity Engineer
- Data Center Architect
- Data Engineer
- Data Scientist
- Enterprise Platform Architect
- Global Infrastructure Manager
- Google Cloud Architect & Developer
- Head/Director/Manager of IT
- Head/Director/Manager of Security
- Head/VP/Director of Infrastructure
- Infrastructure Analyst & Architect
- ITDMs
- iOS Developer
- ML Architect & Developer
